

### Ethernet Made Easy

Innovative Cognitive printers lead the pack with network and mobile network ready e+Solutions. For small and intermediate size network installations where small size and low price point are key factors, e+Solutions offer the only internal ethernet ports in the industry. For applications from warehouses to hospitals, e+Solutions make network printing fast and easy.

### Get inControl

Designed for network administrators by network administrators, *inControl* presents critical network information in an intuitive graphical interface. Only *inControl* has the ability to create printer profiles so that adding a new printer to the network is as easy as plugging in the printer and clicking a few buttons. Upload firmware to every printer on the LAN, WAN, or Mobile Network. *inControl* puts the network administrator in control.

*Maintain a low-profile and a low price point with small footprint, sleek looking e+Solutions printers.*

*Just plug in and print.*

### inControl™

The screenshot shows the InControl software interface with a menu bar (Printer, Profile, Advanced, Database, Help) and a toolbar with icons for Locate, Setup, Apply Profile, Diagnostics, Filter, and Printer Status. Below the toolbar is a table of printer information. To the left of the table, red lines point from text labels to specific icons and rows in the table. An inset window titled 'Out of Media--130.60.10.108 (Blaster...)' shows a diagram of a printer with a paper roll and buttons for Dismiss, Configure, Help, and More.

Labels pointing to the interface:

- Locate new printers with a mouse-click (points to the Locate icon)
- Change printer settings (points to the Setup icon)
- Apply settings to a group of printers (points to the Apply Profile icon)
- Perform diagnostic tests (points to the Diagnostics icon)
- Filter the printer list (points to the Filter icon)
- Check printer status (points to the Printer Status icon)
